With the support of the  
Erasmus+ Programme  
of the European Union

## ABOUT

The Erasmus Mundus Joint Master Programme **BIOPHAM** aims at emerging the new discipline of “pharmaceutical materials science” by offering a very rich education and training programme at the interface between materials science and **physics/chemistry of materials and pharmaceutical sciences**: disordered and off-equilibrium systems, mechanical behaviour of materials, molecular and soft condensed matter, materials science of drugs, thermodynamics and phase transformations, materials science & pharmaceutical developments, fundamentals of molecular modeling or advanced experimental characterization techniques including instruments available at large scale facilities.

## QUICK FACTS

- 2 years International Master Programme (120 ECTS)
- All Courses are taught in English
- Cross cultural Education
- Double/Multiple Master's degree
- Large Network of companies involved
- Openings to PhD careers and/or highly qualified positions in industry Worldwide

## FINANCIAL SUPPORT

The Erasmus + programme helps you with a full financial support depending on your country of residence.

- Up to 1.000€ per month
- Up to 1.000€ for your installation costs
- Up to 3.000€ for your travel costs
